

Janata Bank Limited Market Disclosure for December 2020 Under Pillar-III of Basel III

The purpose of Market disclosure in the Revised Capital Adequacy Framework under Pillar-III of Basel III is to complement the minimum capital requirement and the supervisory review process. The aim of introducing market disclosure in the revised framework is to establish more transparent and more disciplined financial market so that stakeholders can assess the position of a bank regarding holding of assets, identify the risks relating to the assets and capital adequacy to meet probable losses. The reports will enable market participants to assess key information relating to bank's regulatory capital and risk exposures more effectively in order to instill confidence about a bank's exposure to risk and overall regulatory capital adequacy.

The qualitative and quantitative disclosures of the bank under Basel-III requirements based on the audited financial statements as of 31 December 2020 have been prepared as per "Guidelines on Risk Based Capital Adequacy" of Bangladesh Bank to establish more transparent and more disciplined financial market.

1. Scope of Application

			of BDT 5000 million. Its paid-up capital is BDT 4274 million. The
			Company started its operations on 26 September 2010. Its main
			functions are issue management, underwriting and portfolio
			management.

			2) Janata Exchange Company Srl, Italy
	closure		Janata Exchange Company Srl. Italy was incorporated on 18 January 2002 vide Ministry of Finance letter no # অম/অবি/ব্যাংকিং/শা- ৭/বিবিধ-১২(২) ২০০০ dated 3 January 2001 and letter no # অম/অবি/ব্যাংকিং/শা-৭/১২(২)২০০০/১৬৪ dated 27 June 2001 with 100% ownership of Janata Bank Limited having authorized capital of ITL 1.00 Billion. Its paid-up capital is EURO 600,000. Apart from Rome Branch, JEC, Italy has another branch in Milan which was established vide MOF's approval letter # অম/অবি/ব্যাংকিং নীঃ/শা-১ /১২/(২)/২০০/৩৫২ dated 24 November 2002.
	disc		3) Janata Exchange Co. Inc. New York, USA
Scope of application	Qualitative disclosure		Janata Exchange Co. Inc. USA was incorporated on 10 April 2012 vide Bangladesh Bank letter # BRPD(M)204/7/2011-342 dated 28 December 2011 and New York State Department Of Financial Services Certification no. MTM103045 with 100% ownership of Janata Bank Limited having paid up capital of USD 1.00 Million.
Scope of		c) Any restrictions, or other major impediments, on transfer of funds or regulatory capital within the group.	Not applicable
	Quantitative Disclosure	d) The aggregate amount of surplus capital of insurance subsidiaries (whether deducted or subjected to an alternative method) included in the capital of the consolidated group.	Not applicable

2. Capital Structure

Assessing regulatory capital in relation to overall risk exposures of a bank is an integrated and comprehensive process. Janata Bank Limited follows the 'asset based' rather than 'capital based' approach in assessing the adequacy of capital to support current and projected business activities.

Capital structure	Qualitative Disclosures	a) Summary information on the terms and conditions of the main features of all capital instruments, especially in the case of capital instruments eligible for inclusion in CET 1, Additional Tier 1 or in Tier-2.	 The capital of Janata Bank Limited can be classified into two tiers. The total regulatory capital will consist of sum of the following categories: 1. Tier-1 Capital (going-concern capital) a) Common Equity Tier-1 b) Additional Tier-1 Tier-2 Capital (gone-concern capital) Tier-1 capital consists of CET-1 and Additional Tier-1 capital, highest quality capital items which are stable in nature and allow a bank to absorb losses on an ongoing basis. CET-1 includes paid-up capital, statutory reserve, general reserve, retained earnings, minority interest in subsidiaries. Tier-2 capital lacks some of the characteristics of the core capital but bears loss absorbing capacity to a certain extent. Capital consists of applicable percentage of revaluation reserves and general provision (against unclassified loans, SMA and offbalance sheet exposures). In December 2018, Janata Bank Limited issued subordinated bond for Tk. 15,000 million for

Note: Janata Bank Limited has calculated the required provision against unclassified and classified loans & advances including writ as per Bangladesh Bank letter ref: DBI-2(UB-2)/2230/2021-886 Dated 20 May 2021 and DBI-2(UB-2)/2230/2021-777 Dated 20 April 2021. Capital has been calculated considering the Regulatory forbearance. Without considering the forbearance, bank supposed to keep provision amounting to BDT 16,083.76 crore against total loans & advances. Considering the allowed forbearance, the bank maintained provision amounting to BDT 4,367.04 crore. Therefore, provision shortfall stood BDT 11,716.72 crore at the end of the year 2020 that is deferred by Bangladesh Bank in their above mentioned letter.

4. Credit Risk

Credit risk is the potential loss that may arise from a borrower's failure to repay a loan or meet its obligation in accordance with agreed term. Banks are very much prone to credit risk due to its core activities i.e. lending to corporate, SME, individual, other bank/FI or to other country.

5. Equities: Disclosures for Banking Book Positions

Qualitative Disclosure:

Investment in equity securities are broadly classified into two categories:

Quoted securities: These securities are bought and held primarily for the purpose of selling them in the future or holding for dividend income, which is reported at cost. Unrealized gains are not recognized in the profit and loss statement. However, required provisions are kept for diminution in value of the investment.

Unquoted securities: Investment in unlisted securities is reported at cost under the cost method.

Adjustment is given for any shortage of book value over cost for determining the carrying amount of investment in unlisted securities.

The primary aim of investing in these equity securities is selling them in the future for capital gains or holding for dividend income. As per BRPD Circular No. 14 dated June 25, 2003, investments in quoted shares and unquoted shares are revalued at the year-end at market price and as per book value of the last audited balance sheet of that company, respectively. Provision should be made for any loss arising from diminution in value of investments (portfolio basis), otherwise investments are recognized at cost.

Investments in shares and securities generally fall either under "At fair value through Profit or Loss Account" or under "Available for sale", where any change in fair value at year-end is taken to the Profit or Loss Account or Revaluation Reserve Account, respectively.

Investment Class	Initial recognition	Measurement After Recognition	Recording of Changes
Un-quoted shares	Cost	Lower of cost or NAV of last Audited account.	Profit or Loss account.
Quoted Shares	Cost	Lower of cost or market price at Balance Sheet date.	Loss to Profit or Loss account.

6. Interest Rate Risk in the Banking Book (IRRBB)

Interest Rate Risk in the Banking Book reflects the shocks to the financial position of the bank including potential loss that the bank may face in the event of adverse change in market interest rate. This has an impact on earning of the bank through Net Interest Earning as well as on Market Value of Equity or Net Worth.

in the banking book (IRRBB)	Qualitative Disclosures	(a) The general qualitative disclosure requirement including the nature of IRRBB and key assumptions, including assumptions regarding loan prepayments and behavior of non- maturity deposits, and frequency of IRRBB measurement.	To manage this risk in the banking book, bank considers the impact of interest rate changes on both assets and liabilities, and its particular features including, among other things, terms and timing. Changes in interest rates affect both the current earnings (earning perspective) as well as the net worth of the bank (economic value perspective). JBL periodically computes the interest rate risk on the banking book that arises due to re-pricing mismatches in interest rate sensitive assets and liabilities. For computation of the interest rate mismatches the guidelines of Bangladesh Bank are followed. Details relating to re-pricing mismatches and the interest rate risk thereon are placed to the ALCO regularly.
Interest rate risk	Quantitative Disclosures	(b) The increase (decline) in earnings or economic value (or relevant measure used by management) for upward and downward rate shocks according to management's method for measuring IRRBB, broken down by currency (as relevant).	At 1% increase/ decline in Interest Rate, change in net interest income is BDT 167.94 million

7. Market Risk

Market risk is defined as the possibility of loss to a bank caused by changes/movements in the market variables such as interest rates, foreign currency exchange rates, equity prices and commodity prices. Bank's exposure to market risk arises from investments (interest related instruments and equities) in trading book [HFT categories] and the foreign exchange positions. The objective of the market risk management is to minimize the impact of losses on earnings and equity.

Market Risk	alitative Disclosures	 (a) Views of BOD on trading/ investment activities Methods used to measure market risk Market Risk 	 The Board approves all policies related to market risk, sets limits and reviews compliance on a regular basis. The objective is to obtain maximum returns without taking undue risks. Standardized Approach (SA) is used for calculating capital charge against market risk (interest rate risk, equity position & foreign exchange risk) which is determined separately. The total capital requirement in respect of market risk is the sum of capital requirement measured in terms of two separately calculated capital charges for specific market risk and general market risk for each of these market risk sub-categories. Janata Bank Limited makes investment decision based on historical data of market movements of all comparable financial instruments to

8. Operational Risk:

Operational Risk is defined as the risk of losses resulting from inadequate or failed internal processes, people and systems or from external events. This definition includes legal risk, but excludes strategic and reputation risk. Bank strictly follows KYC norms for its customer dealings and other banking operations. The bank is going to frame comprehensive operational risk management policy to be approved by the board.

Operational Risk	Qualitative Disclosures	 Views of BOD on system to reduce Operational Risk Performance gap of executives and staffs Potential external events Policies and processes for mitigating operational risk 	Internal Control & Compliance (ICC) is the main tool in managing operational risk. Management, through three units of ICC i.e. Monitoring, Compliance and Audit & Inspection; controls overall operation of the bank. Board audit committee directly oversees the functions of ICC in managing operational risks. There is no significant performance gap as Janata Bank Limited takes necessary steps for Human Resource development and ensures proper distribution of its human resources. No potential external event is expected to expose the bank to significant operational risk. Janata Bank Limited has formed MANCOM (Management Committee) to identify measure, monitor and control the risks through framing required policies and procedures. The policy of managing operational risk through internal control and compliance is approved by the board of directors taking into account the relevant guidelines of Bangladesh Bank. DCFCL (departmental control function check list) and QOR (quarterly operation report) are applied for evaluation of the branches operational performance. Manuals related to credit, human resources, finance & accounts, treasury, audit and inspection etc. have been prepared for continuous recognition and assessment of all material risk that could adversely affect the achievement of Banks goal. The Audit & Inspection division makes a year wise risk based audit plan to carry out comprehensive audits & inspections on the banking operations and procedures are in place & complied with.

9. Liquidity Ratio:

		(a) Views	of	The board of directors of Janata Bank Limited has always been conscious of
	res	BOD	on	managing the assets and liabilities of the bank in order to maximize the
.9	on BOD on systems to reduce liquidity risk		to	shareholders' value, enhance profitability and increase capital to protect the
Rat				bank from any adverse financial consequences arising from liquidity risks.
		isk	The board oversees the measurement and management of liquidity risk	
ibiu	tive tive			profile. BOD plays pivotal roles in controlling the overall liquidity risk
Liquidity	Qualitative			through reviewing various reports and ensuring necessary steps taken by the
-				management. All strategies and policies pertaining to liquidity management
	0			require approval of BOD.

		Methods of	The aim of bank is to maintain adequate liquidity required at all times and in all
		measuring	circumstances. To maintain this goal Janata Bank Ltd identifies and monitors the
		liquidity risk	driving factors of liquidity risk considering the following aspects:
			Cash Reserve Requirement (CRR)
			Statutory Liquidity Ratio (SLR)
			Medium Term Funding Ratio (MTFR)
			Maximum Cumulative Outflow (MCO)
			• Advance Deposit Ratio (ADR)/Investment Deposit Ratio (IDR)
			Liquidity Coverage Ratio (LCR)
			Net Stable Funding Ratio (NSFR)
			Bank uses its own liquidity monitoring tool:
			Liquidity Contingency Plan
		Liquidity risk management	Liquidity Risk Management System of Janata Bank Limited has the following objectives:
	Qualitative Disclosures	system	• To provide adequate liquidity to the bank by reducing maturity mismatches within manageable permitted levels.
Liquidity Ratio			• To ensure that the current and potential demand for funds is supported by cash and liquid assets.
uidity	tive I		• The possible needs of liquidity shall be measured keeping in view:
Liq	alita		• The need to replace the net outflow of funds-Funding Risk
	Qu		• The need to compensate for the non receipt of expected inflows-Time
			Risk
			• The need to meet contingent liabilities when they become due – Call Risk
			• The need to undertake a new transaction.
		Policies and processes for mitigating liquidity risk	The main objective of liquidity policy is to ensure that liquidity positions are sufficient to meet day to day, cyclical and long-term requirements at the lowest possible cost. The approach will be governed by prudence and, in accordance with the applicable laws and regulations, best international practice and the competitive situation within which bank operate in the local and international financial markets. In order to manage the liquidity risk, the BOD of the bank has formed Asset Liability Management Committee (ALCO) which meets at least once a month to monitor the liquidity position and take appropriate steps to manage liquidity risk. The bank has a treasury manual as policy support to combat liquidity risk. A Liquidity Contingency Plan has been developed keeping in mind that enough liquidity is available to meet the fund requirements in liquidity crisis situation.
